

MD-DE SAF Spring, 2021 Meeting Invaders Affecting our Forest Floor

May 13th, 2021, 9:00am –12:00pm

We're glad to offer informative presentations about invasive species invading our forests and affecting forest regeneration.

Non-native Invasive Earthworms and how they are affecting our Forests.

Discuss what makes most earthworm's invasive species in North America. Beginning with European earthworms (e.g. Nightcrawlers), how they got here, what their impacts are & what can do.

Trends in Invasive Plants of the Eastern Forests

Find out which invasive is slowly blanketing eastern parks, who wins the invasive-on-invasive competition, and what the National Park Service is doing to effectively combat the seemingly insurmountable problem of invasive plants.

MDA forest pesticide applicators regulatory overview

Review of regulation and any changes plus opportunities to improvement and compliance (qualifies for recertification)
